Note:

Chronic events and days are not tallied with other events because normal protocols to remove signs are not followed at these locations. Although sample results at Chronic locations may be within State Standards, the presence of known, on-going sources of contamination require signs to remain posted at these locations to protect public health.

Locations under a chronic status for all or part of the year include: Loma Alta Creek outlet in Oceanside (in 2000 only), Children's Pool in La Jolla, and the Tijuana River outlet at Tijuana Slough National Wildlife Refuge Shoreline and Border Field State Park.
